HISTORY

CHOCOLATE AND CHESS
UNLOCKING LAKATOS
Bandy, Alex
ISBN 978 963 05 8819 5 • 2010 • 476 pp. • 170x240 mm • hardback • price €38
“Chocolate and Chess” is a Holocaust story with a twist. It reads like a thriller, but it is the true tale of Imre Lakatos, the brilliant philosopher of the London School of Economics, who was a mystery to colleagues, friends and lovers and to Britain’s MI5. Surviving the Holocaust, he wanted to start anew and devoted his energies to building the Hungarian Communist Party. Surviving torture and incarceration by his comrades, he left for England for another fresh start. But the secret services of countries on both sides of the Cold War divide remained interested in him, and England denied him citizenship despite the backing of esteemed colleagues like Karl Popper. Based on previously classified Western counterintelligence and Hungarian secret police archives, this book endeavours to fill gaps in the knowledge of both cognoscenti and countercynes.

THE PSEUDISM IN POLICY
PAMPHLET ON REVERSE OF HISTORY
Várády, László
ISBN 978 963 05 8851 5 • 2010 • 56 pp. • 85 • hardback • price €6
The since ever existing roleplayings, theatricalities, and “as-if” phenomena of mankind appear in policy with peculiar emphases, and bear far more relevance than in everyday life owing to their deep public impacts in epochal-historical trajectory. Curious and emphatic evidences are provided by such a statesman as emperor Augustus, highly competent in world wide policymaking, and we have quaintnesses in these concerns with Caesar or later e.g. in the stance thereon with Shakespeare, Sebastian Brant and Carlo Caraffa. The pseudistic phenomena on political stage of Modernity are in the pamphlet together with their manifold sensitive strands and far-reaching effects duly charted and assessed.

ETHNOGRAPHY

KHANTY MYTHOLOGY

Hoppál, Mihály–Napolskikh, Vladimir–Siikala, Anna–Leena
ISBN 963 05 8284 6 • 2006 • 244 pp. • 170x240mm • hardback • price €55
The Encyclopaedia of Uralic Mythologies offers a comparative base for the study of the roots and present forms of Finno-Ugrian and Samoyed mythologies and ethnic religions. The peoples speaking the Uralic languages are indigenous peoples of Northern Asia in the territory extending from Fennoscandia to the Taimyr Peninsula. Along with their complicated histories and cultural differences, the Uralic groups have maintained and created original religious and mythological traditions, where traces of archaic religious systems, e.g. shamanism, animal ceremonialism and astral mythology, merged with ancient foreign influences and more recent religions.

ETHNOGRAPHY

DANCE STRUCTURES

Kaepler, Adrienne L.–Dunin, Elsie Ivancich
ISBN 978 963 05 8542 2 • 2007 • 424 pp. • 170x240mm • hardback • price €48
The study and analysis of dance structures have been of continuing interest since the mid-twentieth century; however, the lack of a compendium of studies on the varied approaches has hindered further development and comparative work. This book fills that gap and presents various perspectives on the analysis of human movement systems from a wide range of societies in several parts of the world.

The study of literature has been an integral part of academic education for over a century now. Owing to its medium, language, literature is a major component of degree courses in foreign languages, of which English is by far the most popular today.
